

PUNOS Project

The keys to interpreting services
for the verbally impaired

The mission of the Punos Project

- The development of local and remote communication using technology on the market
- A deepening in general awareness of the different methods of communication, technical aids and interpreting service used by the verbally impaired
- An increase in the equal availability and accessibility of interpreting services for the verbally impaired using information and communication technology

Starting point

- The widest possible use of existing, well-functioning communication technology and its related expertise in the development of remote services for the verbally impaired.

- Also co-operating:
- The Stroke and Dysphasia Federation
- The Finnish Neuromuscular Disorders Association
- The Finnish CP Association
- The Finnish Association on Intellectual and Developmental Disabilities (FAIDD) / Tikoteekki
- The project is managed by the Honkalampi Foundation and funded by the Finnish Slot Machine Association (RAY).
- The project runs from 2008 to 2011.
